

MaxView Release 6 Product List

MaxView Release 6, designed for Internet distribution of construction bid sets and other on-line technical documents, incorporates many new features and enhancements. With new and improved navigation tools and proximity based object actions while doing takeoffs and markups you will immediately experience performance and productivity benefits. New tools have been added for use with PDF/TIFF/CAL and JPG files, and toolbars have been reorganized into useful groups which you can now customize and configure to meet your individual needs.

As with previous Releases, the product family starts with the free MaxReader and inclusively builds on each subsequent higher level of product culminating with MaxWebAuthor, which is our most inclusive off-the-shelf offering. To evaluate MaxView for 30-days downloaded the application from www.maxview.com. To activate an evaluation period for MaxWebAuthor, please contact your sales representative. MaxView offers online registration and annual or three year subscription licensing through the software Registration dialog screen.
